FALL 2020

TIMBERLAKE[®]
CABINETS

DIFFERENT YEARS.

DIFFERENT STYLES.

DIFFERENT APPROACHES.

AND ONE CONSTANT:

The Timberlake® Advantage

Built by Service®

We think like builders. That means looking for ways to contribute to success by adding value, saving time, and eliminating costs. We're planning ahead to prevent problems instead of fixing them. Designing to save money. Scheduling to make every minute count. Installing for one-trip satisfaction. We're a partner every step of the way.

We focus on cabinets

That's all we've done for the past three decades. When you team up with Timberlake, you benefit from years of experience and refinement. That means high-quality materials, craftsmanship, and service—start to finish.

Quality meets value

We make it easy to choose the perfect combination of features for your needs and budget. Our premier lines, Portfolio Select and Portfolio, include numerous upgrade options that make customizing easy. And Value Built offers well-crafted, fashionable cabinets for the more budget-conscious consumer.

Built from a culture of excellence

As one of the leading cabinet manufacturers in the United States, American Woodmark, headquartered in Winchester, Virginia, offers over 500 cabinet styles. We set the standard for fully integrated, just-in-time manufacturing, operating 17 manufacturing facilities and 20 builder service centers.

The strength and inspiration of our thousands of dedicated employees is the reason for American Woodmark's success and leadership in the industry. The team continues to be the benchmark for our industry by producing quality cabinets, offering top-tier customer support, providing value to our customers, and enhancing homes with American Woodmark products.

OUR LONG-TERM VISION IS FOCUSED ON MAINTAINING OUR CULTURE OF EXCELLENCE. WE PROMISE TO RENEW THIS COMMITMENT EVERY DAY.

Finishes & Materials

OPTIONS

PREMIUM FINISHES

Add luxuriously rich color to your cabinets with a premium finish. Choose a painted finish for a beautiful, soft look. Or go with a glaze to accentuate the personality of the door profile.

THE MATERIALS

CHERRY

Cherry, a closed-grain, uniform-texture hardwood, shows distinctive curly figures and pin knots. Natural pale-yellow sapwood to reddish-brown heartwood darkens over time. It's attractive in a deep stain.

MAPLE

Maple is an extremely hard wood with a fine, even texture. Color can be light to cream-colored. Its uniform straight grain may show wavy, bird's eye, or burl graining. Popular for its durability and luster.

HARDWOOD

Hardwoods include dense-structured maple, oak, birch, cherry, hickory, poplar, and ash. Color ranges from light blonde to dark reddish-brown. Variations of graining, color, and mineral streaks are natural.

PAINTED

Painted finishes combine hardwoods and engineered materials for stability, consistency, and durability, with minimal grain visibility. Joint lines may appear due to the wood's natural expansion and contraction.

DURAFORM®

Duraform uses advanced manufacturing to bond foils and coatings to medium-density fiberboard, high-density fiberboard, and similar materials for exceptional stability, consistency, and durability.

THERMOFOIL

Thermofoil is a process that bonds a thick vinyl film to a warp-resistant engineered wood core. Because color is throughout the film, the surface is durable, easy-clean, and resistant to chipping and cracking.

DISTINCT LOOK

Our glazes are hand-wiped, so they settle naturally into corners and grooves, adding a layer of contrast. No two doors will be exactly alike, which is part of glaze's custom effect.

EACH DOOR—AND KITCHEN—BECOMES ONE OF A KIND.

GLAZE OVER A LIGHT BASE COLOR CREATES THE GREATEST CONTRAST. AREAS WHERE THE GLAZE SETTLES WILL BE MORE NOTICEABLE.

GLAZE OVER A DARK BASE COLOR CREATES LESS CONTRAST. IT WILL ALSO DARKEN THE OVERALL FINISH.

IT'S A FACT OF NATURE

No two pieces of wood are exactly alike—even from the same tree. These variations contribute to the beauty and distinction of fine cabinetry. Yet, it is important to understand what to expect.

Natural Factors

The following characteristics are natural and are not considered defects:

- Naturally occurring color, grain, and texture differences
- Color deviations, even within the same section of wood
- Differences between open- and closed-grain areas
- Visible mineral streaks and worm tracking

Just as wood naturally expands and contracts, so do door joints. Periodically, you may see hairline cracks in the finish surface at the joints. These are normal and do not affect the integrity of the door.

Care & Cleaning

While our laminate, painting, and wood finishing processes promote durability, care should be taken to preserve the original factory finish:

- Wipe up spills immediately
- Use mild soaps only
- Read all cabinet care guidelines and cleaning product instructions carefully

Environmental Factors

Cabinetry added at a later date may not match the original cabinets installed. This may be due to:

- Exposure to sunlight, smoke, and chemicals
- Change in door samples or displays due to age (they may no longer be a true color representation)

Because of environmental factors, Timberlake is not responsible for texture differences or color and wood grain variations in materials used in your cabinets.

An Inside Look

TIMBERLAKE FEATURES

Choose the perfect combination of features for your needs...and budget. Timberlake makes it simple. There are three series—each with different features and options—to help you satisfy every type of homebuyer: from value to luxury.
